

Color Investigation

Look up a color wheel online for reference if you need to.

- Complementary colors = colors opposite each other on the color wheel (e.g. blue and orange).
- Analogous colors = colors next to each other on the color wheel (e.g. red, red-violet, violet).
- Monochrome colors = one color (e.g. all blues).

1. Create a document of some sort to turn in.
2. Find three good examples of photos that make strong use of complementary colors. Include each photo in your document. Below each photo, write the names of the complementary colors (red and green, etc.)
3. Do the same thing for analogous colors,
4. Do the same thing for monochrome colors (not black and white!)
5. Do the same thing for photos that use a "pop of color" (e.g. a blue bike parked against a brown fence, a woman in bright clothes walking through a crowd of dull-suited businessmen, etc.) You do not have to write the name/s of the color/s. AVOID USING "SELECTIVE COLOR" EXAMPLES, where the image has been made monochrome or black and white except for certain parts! These are HORRIBLY cliché.
6. Put the document in your Google drive Photograph folder or share it with me in some way.
